

○ **Biden/Harris Accomplishments**

- The following is a partial list of Joe Biden's accomplishments to date. Democrats think this is a "nice" legacy. I think it is the path to the ruination of a nation, a country, and a civilization. These are just the ones I became aware of. Undoubtedly there are many others I haven't heard of. Congratulations America, either you legitimately voted for him or the Dems cheated to steal the election. Either way, here's the list I'm aware of. Lest you may have forgotten:
 1. Killed off petroleum imports from Canada and shut down internal petroleum production so we can spend our remaining, worthless currency on Mid-east oil.
 2. Stopped all construction of the border wall leaving huge gaps, yet refused to provide unused and paid for sections of border wall to Texas who wanted to install it.
 3. Totally ignored and hid the massive invasion/influx of illegal immigrants.
 4. Spend trillions of dollars bailing out failed Democrat cities, states, unions, and pension funds.
 5. Spend trillions of dollars sending it to Latin America, Iran, probably others.
 6. "Lend" Canada and other countries millions of doses of vaccine while MD residents can't get any. Because it's illegal to give vaccine to other countries.
 7. Drastically raise personal and corporate taxes.
 8. Raised minimum wage to \$15 per hour for untrained, illiterate employees.
 9. Drastically raised the cost of electricity by closing down coal fired generators.
 10. By opening the unmonitored borders, let in any terrorist to finish Bin Laden's work.
 11. By raising corporate taxes, prevent the re-patriotization of off-shored jobs.
 12. Prevented the law abiding population from acquiring firearms.
 13. Confiscated currently owned firearms.
 14. Encircle DC with troops sleeping on garage floors so that illegal immigrants can have free hotel rooms paid for by taxpayers so that citizens can't get at and hang these politicians who architected this destruction.
 15. Release convicted criminals.
 16. Removed the police so there is no defense from crime.
 17. Intends to confiscate guns so there is no defense from crime and no police to deal with it.
 18. Forced the population into electric vehicles that can't be driven because they shut down existing coal and gas fired generating facilities, won't build nuclear generators, and won't improve the grid. Which is ok because there

- are no jobs, you can't get hired, and you have no expendable income anyway because they destroyed the usefulness and integrity of the dollar.
19. Called everything racist and tried to cancel it, except abortion.
 20. Tried to pack and subsequently destroy the Supreme Court, thereby ending the rule of law.
 21. Drastically raised capital gains taxes thereby destroying investment, jobs, and new worth. Tried to tax unrealized gains on investments.
 22. Approved of DC and Puerto Rican Statehood to increase number of democrat senators.
 23. Gave hotels, airline tickets, and all sorts of additional services to illegal migrants, including cell phones.
 24. Gave Covid vaccine to incarcerated criminals when law abiding citizens couldn't yet get it.
 25. Lowered math class availability for white kids because black couldn't achieve those standards.
 26. Mandated prohibition of gas powered vehicles by 2030 (at \$50,000 with batteries to be replaced every 3 years for \$30,000 and the batteries are not recyclable). Yet refused to increase the electric power generating and transmission capacity.
 27. Raised the capital gains tax to 50% thereby destroying investment and the stock market, bringing the capitalist system to a dead halt.
 28. To understand what fools we're dealing with: John Kerry said it isn't enough to just reduce CO2 emissions, we must also totally eliminate CO2 from the atmosphere, apparently not knowing that would kill off all plant and animal life on the planet - plants breathe in CO2 and exhale oxygen. Kerry would be the first one I'd send to Mars where he could live out his dreams.
 29. Reversed the country as a net exporter of petroleum products.
 30. Caused the price of gasoline to drastically increase.
 31. Put an anti-gun zealot in charge of the ATF.
 32. Reversed all of trump's Executive Orders.
 33. Sent 100 million dollars to Hamas so they could buy rockets to fire at Israel.
 34. Re-instated federal oversight and directives of local zoning actions
 35. Drastically reduced the military budgets.
 36. By approving reckless democrat House spending, drastically increased inflation.
 37. Reduced American nuclear arms.
 38. Reduced sanctions on Iran and Russia. Now who's working for Putin?
 39. Pissed away US energy independence then begged OPEC to increase production, which they refused to do.
 40. Drastically increased taxes and inflation.
 41. Reinfected thousands with imported illegal migrant COVID.

42. His incompetence gravely endangered the remaining American soldiers leaving Afghanistan and left 40 billion dollars of equipment to be captured and used by the Taliban.
43. By Aug. 16th he had completely and thoroughly botched the Afghanistan withdrawal.
44. Refused to allow Canadians into the country but allowed hundreds of thousands of unvaccinated illegals to flow across the southern border.
45. Mandated unisex campus bathrooms.
46. Criminally botched up the Afghan withdrawal.
47. Failed to vet the 100,000 Afghans they imported into this country.
48. Imported hundreds of Afghan terrorists into this country.
49. Imposed mask mandates for Covid, overturned by courts.
50. Dismantled remain in Mexico, overturned by the courts.
51. Promoted no cash bail for criminals permitting their release.
52. Gave SPR oil to China and India instead of using it in the US to lower gas prices.
53. Mandated that incoming legal visitors be vaccinated but not millions of illegal migrants.
54. Pissed away "paid for" border wall building materials by not using them.
55. Failed to enforce prevention of illegal immigration.
56. Did not vet Afghan immigrants, importing thousands of them.
57. Relocated, at night, with flights of migrants to red states across the country with DHS/HHS chartered flights.
58. Is preparing to register, then confiscate or tax, your weapons.
59. Waived sanctions on Iran, a country that refuses to sit in the same room with US negotiators.
60. Allowed Chinese to establish a military base in the Atlantic on an island off the coast of Africa.
61. Destroyed European nation alliances over the Afghanistan withdrawal.
62. Failed to provide sufficient Covid tests.
63. Appointed the stupidest, useless cabinet members in history.
64. Issued mandates that caused people to lose their jobs.
65. Whether you are vaccinated or unvaccinated, you can still get Covid.
66. Failed to curb rampant crime.
67. Failed to install border wall sections that were already purchased and just sitting there.
68. Called American parents "domestic terrorists" for objecting to critical race theory taught in schools.
69. Declared that there is no food shortage while supermarket shelves are empty.
70. Biden admin withheld shipping of 50 million covid testing kits. Then sent out Chinese made ones at taxpayer expense.
71. Biden prioritized race and ethnicity for Covid treatments.

72. Placed 8,500 troops on alert over Russian threat of invasion with 125,000 troops in Ukraine. Yeah, that will be a deterrent. He'll kill us all.
73. Freed alternate 9/11 hijacker and a military base truck bomber.
74. Flew illegal migrants aboard planes to cities at night for relocation and hid it and lied about it.
75. Biden's HHS distributed taxpayer funded crack pipes in "smoking kit" handouts to drug addicts.
76. Biden's democrat Congress federal spending raised inflation to 7.5% per year causing increased costs in every single thing.
77. Biden appointed the first drag queen and the first person to discuss his affinity for sex with animals to hold an office of the public trust at the Department of Energy in charge of nuclear waste disposal.
78. Biden ordered American citizens out of Ukraine but to reenter US, they must be vaccinated but let in 100,000 Afghans and millions of illegal southern border crossers without that requirement.
79. Joe Biden, on his first day in office, artificially restored the climate cost estimate to about \$51 per ton of carbon dioxide emissions after the Trump administration had reduced the figure to about \$7 or less per ton. This was then reversed by a Louisiana court. Caused immense harm to US industries and raised inflation.
80. By leaving Afghanistan, it has now become a hotbed of terrorist and jihadi growth.
81. Biden's DOJ dropped military and economic anti-espionage efforts against China.
82. Faced with invasion by Russia, Biden imposed sanctions on the two Ukrainian provinces under attack by Putin.
83. Biden's weak "sanction" measures on Putin immediately failed allowing Putin to invade Ukraine on Feb. 24, 2022. So much for deterrence.
84. Biden DOJ shut down Trump-era 'China initiative' to counter Chinese espionage.
85. According to Energy Secretary, Jennifer Granholm, the Biden administration has purposely driven gas, oil, and coal pricing significantly higher (they want gas to go to \$10 a gallon, on March 25th, 2022 it reached \$7.99 a gallon in Los Angeles) to promote electric vehicle adoption where non-recyclable LiON batteries need to be replaced every two years at a cost of \$30,000 and an electric grid that cannot support the load now (TX and CA with brownouts) and would require 3,447 new nuclear power plants to be built to generate enough electricity to support our lives and take a minimum of 6 years to build. I certainly didn't vote for these morons.
86. Biden refused to stop buying Russian oil thereby continuing to fund the war against Ukraine. Reversing his actions against US oil production would lower prices and hurt Russia. Russia owns Biden.

87. Biden sanctioned everything BUT purchasing oil from Russia but refused to restore US production to the levels before he took office.
88. Biden is trying to negotiate with the communist Maduro of Venezuela to buy their sulfur laden oil which poisons refineries after Trump cut off and sanctioned Venezuela.
89. Biden lectured a reporter in Europe that “sanctions don’t deter”, then announced that more sanctions would be placed on Russia.
90. Biden announced that there will soon be food shortages due to the war in Ukraine. Actually by severely curtaining petroleum and gas production, it has led to a drastic increase in the price of and shortages of agricultural fertilizers.
91. Obama and Biden annexed a huge amount of land in the western US to create the Bear Ear National Park. Then shut down all of the uranium mining forcing the import of Russian and Ukraine uranium and sent Hillary Clinton with a rest button to buy uranium from Russia and Ukraine. By refusing to license and build nuclear power plants, shutting down oil and gas production, then demanding EV cars (which cannot be charged with the current power capacity anyway}, they have completely immobilized the entire population of the country. No food delivery, nothing. Can you not see how they have destroyed our country?
92. Biden halted an anti-ballistic missile system deployment for the US thereby allowing Putin’s nuclear warheads to fall on America unimpeded.
93. Biden is planning to stop Title 42 deportations that were implemented to prevent spreading Covid infections by illegal immigrant’s, allowing unfettered crossing of the border. Fortunately, a judge blocked Biden’s attempt to end Title 42.
94. Biden is fighting a court decision that disallows his mask mandate for citizens while letting in and transporting throughout the country unmasked and unvaccinated illegal migrants.
95. As countries either cease buying Russian gas or are cut off fromReceiving Russian gas, Biden drastically cut back US gas and oil production.
96. By killing off US energy and gas production, the US is unable to assist Europe with supplying gas to the EU who were trying to reduce their dependence on Russian gas and petroleum. In retaliation, Russia cut off their pipelines to nations refusing to pay in Russian currency.
97. Biden’s Homeland Security Secretary said his agency is “managing” the southern border by allowing 18,000 illegal migrants to cross in EACH DAY.
98. As the southern border is being overrun with illegal migrants, the Department of Homeland Security announces it is setting up a Governance Board to dispel disinformation: specifically, stories of Hunter Biden’s laptop which the board chair labeled as a Trump campaign product.
99. Biden claimed that the government owns your children when they are in the classroom.

100. Rep. Rose DeLauro, D-Conn., a reliable liberal ally, unveiled documents showing the Biden Food and Drug Administration was alerted by a whistleblower last fall about potential contamination issues at the Abbott Nutrition baby formula factory in Michigan in October 2021 and failed for months, till January 31, 2022 to act aggressively. Thereby creating the baby formula shortage. A Florida congresswoman obtained photos and video that showed that pallets of baby formula were being given to illegal immigrants while American shelves were empty of the formula.
101. As gas and oil prices hit a new high on May 12, 2022, Biden cancelled oil and gas leases in Alaska, and offshore.
102. Repair part supply chain and diesel fuel availability issues are causing farm implements to be idled in fields impacting food supplies.
103. Biden authorized E15 (15 % ethanol) gasoline that will destroy internal combustion engines due to the water solubility of the alcohol. E10 destroyed my Mercury 250hp outboard marine engine which won't start or run any more.
104. Biden administration and democrats attempted to legislate the Roe vs. Wade decision to allow abortion up to the moment of birth, and in order to permit the determination of the sex of the baby to be born. Fortunately, it was defeated. But they tried. All democrats except Manchin voted for it.
105. The Biden administration's FBI used terrorist tracking tools to monitor parents who complained about mask mandates for children in schools and the teaching of Critical Race Theory.
106. Friend of communists Biden will ease Trump restrictions on Cuba.
107. Biden proposed a rule to force retirement account managers to prioritize climate change over fiduciary responsibilities to their client's accounts and investments. It was immediately contested by 24 state's AGs.
108. Biden administration ignored for four months the FDA's decision to shut down baby formula production thereby leading to starving babies.
109. Biden, with 13 amendments, attempted to cede U.S. sovereignty within its borders over public health issues to the World Health Organization (WHO).
110. Biden is threatening to withhold school lunch money from children unless schools allow transgender males compete against females.
111. Biden, at the height of gasoline and diesel prices, invoked the Defense Production Act to produce solar cells made almost exclusively in China and revoked Chinese solar panel tariffs.
112. One day after Police caught an attempted murderer of Supreme Court Justice Brett Kavanaugh, the Biden appointed Attorney General Merrick Garland refused to arrest illegal protesters outside Kavanaugh's house who were clearly conducting a Federally prohibited protest. Yet another one of Biden's stellar cabinet appointees like the cross dressing and high heel wearing nuclear energy waste secretary. Merrick Garland was nominated by Obama for the Supreme Court. Fortunately he was not confirmed.

113. On June 9, 2022, the average price of gasoline exceeded \$5.00 per gallon. Biden wants it to go to \$10.00 per gallon.
114. At the height of unprecedented inflation, Biden forgives \$10,000 of college student loan debt incurred by gender studies and art history majors who took overseas study vacations in Europe.
115. Biden attempted to restrict ICE (Immigration and Customs Enforcement) ability to deport and restrain illegal immigrants but was struck down by a Federal judge on June 10, 2022.
116. Biden To Direct HHS To Expand Access To Sex Change Treatments, Particularly For Children.
117. "There are 60 commercially operating nuclear power plants with 98 nuclear reactors in 30 U.S. states (the Indian Point Energy Center in New York has two nuclear reactors that the U.S. Energy Information Administration counts as two separate nuclear plants). Of these nuclear plants, 36 have two or more reactors. The Palo Verde nuclear power plant in Arizona is the largest nuclear plant, and it has three reactors with a combined net summer electricity generating capacity of 3,937 megawatts (MW). The R. E. Ginna Nuclear Power Plant in New York is the smallest nuclear plant, and it has one reactor with a net summer electricity generating capacity of 508 MW. The newest nuclear reactor to enter service, Watts Bar Unit 2 with 1,150 MW net summer electricity generating capacity, began commercial operation in October 2016. Two new nuclear reactors are actively under construction: Vogtle Units 3 and 4 in Georgia." Yet, Biden is shutting down coal and gas fired generators without first building up nuclear generation capacity. Solar and wind are a joke as shown by the grid failure in Texas as base load generation capacity. It takes roughly 16-20 years to build new nuclear generation capacity due to local, state, and federal permitting processes and regulations. Here are the energy sources in the US: Natural gas: 31.8%, Petroleum (crude oil and natural gas plant liquids): 28%, Coal: 17.8%, Renewable energy: 12.7%, Nuclear electric power: 9.6%. So Biden is shutting down 77.6% of the country's energy sources yet replacing it with nuclear would take at least 20 years which he has made no effort to improve. By then, we'd all be in the dark freezing to death in the winter and suffocating in the summer. Yeah, what geniuses Biden and these greenies are.
118. Biden claimed that if he was doing such a bad job, why were other industrialized countries inflation rates doing worse. A flat out lie.
119. On June 23, 2022, at the height of gasoline prices, Biden called oil company CEOs to the White House to discuss oil prices but refused to meet with them personally, instead referring them to staff yet plans to fly to Saudi Arabia to meet with oil sheiks. Yet, he personally met with green energy CEOs.

120. Biden is changing Title IX to allow transgenders or those who “identify” as transgender to compete against women. Title IX, passed on June 23, 1972, allowed women to compete in sports and obtain scholarships based on their successful competition. This action will prevent women from obtaining those scholarships. Biological women cannot successfully compete with biological males, transgender or not. This action is being promoted by LGBTQ proponents to legitimize their existence, a form of mental disorder.
121. Biden, addressing the nation after the strike-down of Roe Vs. Wade, stated that the US was not in line with abortion allowed up to 15 weeks when other countries do which is not true. In Poland, abortion is only allowed in cases of rape or incest. In Ireland and Germany abortion is only allowed during the first 12 weeks. Italy 13 weeks. France, Austria, and Spain 14 weeks. After 18 weeks: Sweden. Allowing abortion after 20 weeks: North Korea, China, and Vietnam. Japan: 22 weeks for socio-economic reasons. 24 weeks: the UK. In 1982 Joe Biden proposed a constitutional amendment that would overturn Roe v. Wade and allow states to choose their own policies on abortion.
122. U.S. President Joe Biden has proposed blocking all new drilling in the Atlantic and Pacific Oceans as the world cries out for more energy from more sources far from Russia, the Middle East, and the OPEC oil cartel. Biden is also moving to shut down exploration and production of oil and gas on onshore federal lands while acknowledging the importance of fossil fuels in the U.S. energy landscape. I have recently become aware of over 100 actions that Biden has taken to cripple and eliminate the oil and gas industries.
123. Biden, cancelling oil and gas leases on federal land, the Pacific ocean, and the Atlantic ocean, blames oil companies, then Putin, and finally gas stations for the escalating gasoline prices.
124. Amid the highest gasoline prices and diesel shortages in history, Biden is selling 950,000 barrels of oil from the Strategic Petroleum Reserve to China through a trading company tied to Hunter Biden, while 5,000,000 barrels were sent to Europe.
125. Biden has signed 530 Executive Orders spending over 500 billion dollars without any approval by Congress. 20 billion dollars will be provided to illegal migrants.
126. Asked to help alleviate world food shortages by allowing more fields to be dedicated to food rather than ethanol corn for gas, Biden refused.
127. Biden sold this country out to China by shutting down all forms of fossil fuel production and handing over the energy production of this country to a country that uses no green energy, is building their fossil fuel generation capacity, and manufactures the unreliable green energy production facilities to be sold to this country.

128. Biden's Dept. of Education is threatening to withhold school lunch funding unless states conform to their rewrite of Title IX permitting boys to compete in sports against girls.
129. Biden has directed the EPA to increase air pollution regulation which will force the shutdown of coal fired electric generators which will kill the country, economy, and heating and cooling. End of life America, you voted for him, not me.
130. Biden's Bureau of Land Management suspended nearly all oil and gas leases in Colorado with no reason or explanation.
131. The Communist Biden lifted the trade sanctions on China that Trump had imposed to restrict their wanton trade income from the US and allowed them to import their goods without tariffs.
132. Contained in the \$739 billion "Inflation Reduction Act" that Biden just signed is a provision to allow Canadian citizens to come to the US to buy an electric vehicle, the the US will send that Canadian subsidies for the purchase. Prime Minister thanked Biden for the offer.
133. Biden had taxpayers fund a \$500,000 security fence around his beach house. More than his yearly salary as president. Probably to protect him from invading illegal aliens.
134. A Federal court ruled that Biden does not have authority to block oil and gas leases.
135. Biden used \$300 billion to \$1 trillion in taxpayer funds to buy off the student loans of deadbeat baristas and art history majors who couldn't get jobs flipping burgers. Yet, refusing to build the border wall and close the border is insanity This was nothing more than a payoff to "squad" members and vote buying by democrat socialists. My opinion counts for nothing but I was taught that the House appropriates funding, the Senate approves it and the President signs it into law. That's not at all how this action occurred. Biden has become the king of the USA, dictating how things should occur. That's why this country was formed in the first place. I believe that his actions are unconstitutional and will be overturned by the courts. It is just flat out bribery.
136. With Biden not enforcing southern border crossings by millions of illegal immigrants yet refuses to allow Canadians and Europeans to enter the country unvaccinated.
137. The Biden department of agriculture is pressuring schools by withholding funding for children's school lunches if the schools don't let boys use girl's bathrooms.
138. Biden is attempting to blame the crime increase on Republicans. Nothing is further from the truth, this is a direct lie. The crime increase is directly traced to Democrat governors and mayors who have defunded the police and Soros sponsored prosecutors who have released criminals without bail and refused to prosecute criminals.

139. The Biden administration has announced the expansion of taxpayer-funded "gender-affirming" healthcare for transgender and "gender diverse" federal employees.
140. Delayed railroad strike till after the mid-term election.
141. Also asked Saudis to delay oil production shutdown till after mid-term elections.
142. Will cause the destruction of food sources by refusing to have sufficient diesel fuel produced to allow farmers to tend to their land and truckers to distribute food to the rest of the US.
143. Although Biden bragged that he had negotiated to avoid a railroad union shutdown before the midterm elections, immediately after the elections, the railroads announced that they would indeed shutdown operations if their demands weren't met. Biden then stepped away from negotiation responsibility and handed the problem over to congress to solve.
144. Although the Biden administration handed hundreds of billions of dollars to Ukraine, the administration has blocked the congressional attempt to audit how that money was spent.
145. In order to attempt to bolster the Border Patrol at the southern border, the Biden administration moved TSA air marshals away from their jobs in aircraft to the southern border.
146. The Biden HHS approved a request from Washington State to offer health insurance to illegal aliens. Why not just offer it to Nigeria?
147. Biden's Commerce Department is proposing to limit the speed of boats 35 to 65 feet in length to 10 knots 7 months of the year from the coast out to 100 miles to prevent hitting a right whale.
148. On January 8, 2023, nearly two years after he was installed into office, Biden finally visited the border town of El Paso for 3 hours. He met with no migrants and it was after the city of El Paso had cleaned out migrant communities living on the streets in tent cities.
149. Biden's administration is attempted to "regulate" gas stoves and remove them from sale, use, or repair.
150. Joe Biden banned mining in 225,000 acres of Minnesota's Iron Range, and locked up development of taconite, copper, nickel, cobalt, platinum-group elements. Unfortunately, this harm to our country and our future has become the norm, as this president's goal is to put America last.
151. The Biden administration's border policies have led to a mass influx of illegal immigrants, and ranchers are increasingly concerned that they will bring with them a highly contagious virus for Foot And Mouth Disease that could cost billions and decimate the livestock industry. It will affect all cattle, cows, pigs, and lamb.
152. Biden refused to shoot down a Chinese balloon that drifted over the US resulting in without knowing exactly what it was carrying.

153. In June 2022, Biden lectured people on the revised Georgia voting law changes that he said were worse than Jim Crow, more like Jim Eagle. He was dead wrong, Georgia had the highest turnout in their history with 0% of poor people reporting they had a poor voting experience.
154. Biden allowed a Chinese spy balloon to drift complete across the US without downing it.
155. Biden hired 87,000 new IRS agents, armed them, and succeed them on the American public who have not been accused of withholding taxes or income. This is declaring war on the American people uncaused of anything.
156. Biden is attempting to force retirement investment funds into environmental, social, and governance funds instead of funds that return the highest investment returns.
157. At first, Biden did not address the very large Chinese spy balloon for over a week, allowing it to drift all the way across the US before having it shot down. Then he had shot down three other small, probable weather balloons without being able to identify them.
158. The goal of fair housing would seem to be quite straightforward. As spelled out in the Fair Housing Act of 1968 — and found in realtors' offices across the country — it precludes "discrimination in the sale, rental and financing of dwellings ... based on race, color, national origin, religion, sex (including gender identity and sexual orientation), familial status, and disability." In other words, those who can afford to rent or buy should not be precluded from doing so for reasons having nothing to do with the ability to pay. But for the Biden Administration's Department of Housing and Urban Development, fair housing is more — much more. In proposed regulations that would touch any jurisdiction that accepts any sort of HUD funding, fair housing must mean a plan to "promote equity in their communities, decrease segregation, and increase access to opportunity and community assets for people of color and other underserved communities." Translated that means that the route to upward mobility for disadvantaged minorities lies through their relocation to more affluent communities, where they will no longer be "underserved."
159. A new Biden administration rule on cooking appliances would effectively ban half of all gas stoves on the U.S. market from being sold, according to an Energy Department projection.
160. Biden just appointed someone who knows absolutely nothing about aviation to be head of the FAA. This person worked in a bus station up to a couple years ago.
161. Biden's Energy Department last month proposed new efficiency standards for washing machines that would require new appliances to use considerably less water, all in an effort to "confront the global climate crisis." Those mandates would force manufacturers to reduce cleaning

performance to ensure their machines comply, leading industry giants such as Whirlpool said in public comments on the rule. They'll also make the appliances more expensive and laundry day a headache—each cycle will take longer, the detergent will cost more, and in the end, the clothes will be less clean, the manufacturers say. Remember how these same fanatics destroyed the domestic toilet in the Obama administration.

162. The failure of three banks in two weeks of March, 2023, including Silicon Valley Bank and Signature Bank two day later, is a saga of utter government incompetence. Call these bank collapses Biden's Banking Busts. The Biden administration has been obsessing on woke causes while banks teeter toward insolvency. Three days before Silicon Valley Bank collapsed, Treasury Secretary Janet Yellen cautioned that climate change puts the banking industry at risk. Yellen was in la-la land, speculating that future storms and tornadoes could diminish the value of banks' assets. Weather is a risk, but she was oblivious to the much more immediate problem facing banks -- the plummeting value of the bonds they own. She was heedless to the impending downfall of SVB and possibly several other small banks that had purchased long-term bonds when interest rates were near zero. In 2022, after doing nothing to tame inflation the previous year, the Federal Reserve hiked rates repeatedly to make up for their previous inaction. Those rapid rate hikes, the most drastic in decades, made the banks' bonds lose value. A week before Yellen's climate change harangue, Moody's Investors Service already had delivered bad news to SVB that it was about to be downgraded several notches because its inventory of bonds was not worth enough to repay depositors. A day before Yellen's loony speech, Federal Deposit Insurance Corp. Chairman Martin Gruenberg also cautioned that the diminishing value of the bonds held by banks meant a \$620 billion problem ahead. The Office of the Comptroller of the Currency, a part of Yellen's Treasury, is responsible for examining the financial condition of banks. It failed to avert the SVB collapse. Yellen has been an outspoken activist for climate change, women's rights and diversity, including appointing the Treasury's first ever racial equity officer. Apparently, the hordes of bureaucrats working under her are also too busy with diversity, equity, and inclusion seminars to prevent banks from failing. As the SVB crisis unfolded, Yellen was MIA. Now she says she's monitoring several banks "struggling with the whiplash in prices" of their bonds. Financial experts warn smaller banks are in for a rough ride, though the big banks like JPMorgan Chase, Bank of America, Wells Fargo and others are not apt to be in trouble. Admittedly, SVB's managers made mistakes. Banking's first rule is that assets should match deposits. If depositors can demand their money back anytime, then using their money to buy long-term bonds is risky. SVB had to sell \$21 billion worth of bonds at a fire sale, taking a \$1.8 billion loss. Trading was suspended Friday in the stocks of

several small banks whose share prices plunged on fears they were in the same situation. On Sunday, New York bank regulators shut Signature Bank. President Joe Biden created the perfect storm for what may become a string of banking busts. In 2021, he lied about inflation, saying it was temporary and "no serious economist" considered it a threat. Yellen and Federal Reserve Chairman Jerome Powell, whose first term was about to expire, went along with Biden and did nothing to bring down prices. It was the single biggest monetary policy mistake in half a century.

163. The Biden administration has announced that it would complete a 20-year withdrawal of 225,504 acres in a northern Minnesota forest area that is home to some of the largest domestic critical mineral reserves. The action announced by the Department of the Interior (DOI) effectively prohibits mining activity from taking place in the Boundary Waters Canoe Area Wilderness in Duluth, Minnesota, and surrounding area for the next two decades. The agency said it took the action in an effort to protect the local environment and watershed, which environmentalists worried would be contaminated by mining activity.
164. Biden vetoed legislation that would have curtailed regulations that would require fiduciary representatives that oversee retirement investments for 150 million Americans to consider Environmental, Social, Government (wokeism) adherence of companies - clearly promoting his woke agenda rather than the financial viability and worth of the companies.
165. Biden has never made himself available to hear about the Cassidy-King proposal to save Social Security from impending 24% benefit cuts.. Biden calls himself a deal maker; we can't make a deal without him. By not engaging, the president is choosing that current retirees' Social Security benefits are cut by 24%.
166. The Biden DOE issued new regulations on air conditioners that will drastically reduce efficiency, performance, and increase operating costs.
167. The black, high school dropout, Phil Washington, that Biden appointed to run the FAA, knew absolutely nothing about aviation. His confirmation hearing was the most pathetic in history. Thankfully, he withdrew saving the FAA from major embarrassment.
168. Now Biden is going to ban the sale of ALL incandescent light bulbs. Flood lights, decorative lights, chandeliers, all of them.
169. The Biden administration's proposed set of Title IX rules to expand the meaning of sexual discrimination to include gender identity would prevent schools and colleges from barring biologically male transgender athletes from competing on female sports teams.
170. The climate insanity infused Biden administration now wants to outlaw toilet paper, to be replaced with bidets. There are virtually no bathrooms in America that are plumbed for or have the space for a bidet unless specifically designed to accommodate one from the inception of the

design. If however that was to happen, I'm sure they would then complain about water use.

171. The EPA is now going to regulate the design of refrigerators, dishwashers, water/dryers, gas stoves, and once again, toilets. None of these appliances work anymore because the rules set are too stringent to support reasonable usage. The Biden administration has reduced the most advanced and prosperous country in the world to a sniveling, third world, banana republic who has been reduced to taking showers in the rainforest and washing clothes in the river with better outcomes than home appliances.
172. The Biden administration's EPA, Dept. of Agriculture, and Energy Department are making rules to oversee this country's farmers and food production. It will result in dramatically higher prices and shortages in the availability of common food items. In addition to making modern life miserable or unlivable, now the government will starve us.
173. Biden vetoes bipartisan bill protecting US companies from Chinese competition. Why would you do that unless bought and paid for by the CCP? Its is traitorous and treasonous.
174. Biden vetoed a bipartisan bill protecting US companies from Chinese competition. Why would you do that unless you were under the paid-for control of the CCP?
175. Biden administration changed the mortgage rates so that people with a 640 credit rating or below get a better mortgage rate than someone with an 800 credit rating. Completely backwards from what it should be where better credit rating get lower mortgage rates than poor credit ratings which should get higher rates.
176. The Biden administration's US Fish And Wildlife Service had banned the use of lead ammunition for hunting on Federal land and lead sinkers and tackle use for fishing on Federal land despite absolutely no scientific data that shows detrimental affects on any wildlife.
177. Biden sicced the DOJ on parents who were objecting to gender "grooming" in public schools.
178. Now Biden is going after gas furnaces as well as all the other appliances. This crazy zealot is ruining the American existence. There is no way the electric power grid can support all these changes.
179. The Biden administration endorses trans males competing in women's sports (because they can't win competing against other males) and promotes gender affirming (indoctrination and coercion) of young children to the opposite of their birth sex (of which there are only two).
180. And now Biden's EPA has issued rules that eliminate chlorinated and fluorinated hydrocarbons from being used as coolants and refrigerants, effectively eliminating refrigeration and air conditioning. Food cannot be kept, homes and businesses (and hopefully government buildings) cannot

be air conditioned, cars, railroads, aircraft, busses, all forms of transportation.

181. Over the past two years, President Biden and Treasury Secretary Janet Yellen have negotiated a global minimum tax through the Organization for Economic Co-Operation and Development (OECD). This organization surrenders America's sovereignty over our tax code and allows foreign countries to take our taxes that were meant for our own essential programs.
182. Now the Biden administration has targeted water heaters. Under the rule, the federal government would require higher efficiency for heaters using heat pump technology or, in the case of gas-fired water heaters, to achieve efficiency gains through condensing technology. Non-condensing gas-fired water heaters, though, are far cheaper and smaller, meaning they come with lower installation costs.
183. The Environmental Protection Agency is proposing a new rule limiting CO2 emissions from fossil fuel-fired (coal and natural gas) power plants. The grid implied by the EPA rule, heavily dependent on sporadic wind and solar power, would result in devastating blackouts. It was further calculated that if the grid were to be made mostly (but not entirely) immune to blackouts, while still complying with the EPA rule, another \$246 billion would have to be spent within the Midcontinent system alone.
184. The Biden administration is requesting Congress spend six times more on supporting Ukraine in its war against Russia than on the border and fentanyl crisis plaguing the nation, according to a new emergency spending request submitted 8/10/23. In the request sent to House Speaker Kevin McCarthy, Biden specifically called for \$24 billion in aid to Ukraine, split between \$13 billion for defense related spending, and \$11 billion in economic and humanitarian assistance. But Biden only requested \$4 billion in spending on the border and immigration, as well as combating fentanyl flowing into the United States from foreign origins.
185. Biden now admits that the Inflation Reduction Act of 2022 had nothing to do with reducing inflation.
186. The Biden administration is quietly auctioning off millions of dollars' worth of unused parts from former President Trump's border wall for peanuts – in an apparent end-run around pending legislation in Congress.
187. The Biden administration issued new restrictions on oil and gas companies operating in the Gulf of Mexico, in an effort to protect a whale species after it settled in July with a coalition of environmental groups. Among other things, making areas off-limits, imposing speed restrictions, and limiting transit at night and times of low visibility will impact the ability of the offshore energy industry to explore, construct, and develop energy projects in the Gulf of Mexico. The proposed restrictions would potentially eliminate or hamper safely established and efficient activities in the Gulf of Mexico. This will increase fuel prices, increase inflation, raise home heating oil

- prices, increase food transportation and production costs all dramatically impoverishing Americans. All in the name of whale safety.
188. The Biden administration removed dozens of Chinese companies from a trade restriction list the same day a top U.S. official announced her trip to Beijing for “constructive discussions” amid stabilization efforts with China.
 189. For many Americans, this might be the final straw: There's a report that the Joe Biden administration wants to start setting drinks limits for everyone.
 190. Biden is already deciding what kind of car you need to drive, what kind of appliances you must buy, what ideology you must provide for your children through their public schools, for whom you can vote, who (taxpayers) must pay for abortions and mutilating, sex-change surgeries, and more. Now, he wants to limit your alcohol intake to less than two beers per week.
 191. Ceiling fans are now the latest target in the Biden administration's green agenda, sparking pushback from Republicans and manufacturers. The Department of Energy is proposing a rule that would require ceiling fans to be more energy efficient, arguing the move would save U.S. households on energy costs (\$39 over the life of the fan).
 192. The Biden administration quietly rescinded a Trump-era regulation allowing companies to transport liquefied natural gas (LNG) via rail in a victory for environmental groups.
 193. The Biden administration canceled several oil and gas leases issued in early 2021 to an Alaskan state economic development agency, it announced September 6, 2023. The Department of the Interior (DOI) rescinded the seven 10-year leases — spanning 365,775 acres in the Arctic National Wildlife Refuge (ANWR) — held by the Alaska Industrial Development and Export Authority (AIDEA) and supported by a wide range of stakeholders, including lawmakers and Native Alaskans. The leases were issued by the Trump administration in one of its final actions. "This latest action by the Department of the Interior against Alaska and Native Alaskans living inside ANWR shows arbitrary disregard for federal law, based on campaign trail rhetoric. Campaign promises are not enough to justify this agency action," AIDEA Executive Director Randy Ruaro told Fox News Digital. "Under the law, Interior must present real facts and reasons that support this reversal in position."
 194. President Joe Biden's administration finalized plans for a program it argues will further reduce air pollution from heavy-duty engines and vehicles across the United States, but truckers argue the proposed standards will crush the supply chain and put the American food supply at risk. The new emission standards put forth by the Environmental Protection Agency (EPA) "are significantly more stringent," "cover a wider range of heavy-duty engine operating conditions" compared to previous standards and are aimed at reducing emissions of nitrogen oxides and other pollutants. The rule officially went into effect on March 27 of 2023, but will be implemented

for new trucks sold after 2027. It's not just food, absolutely everything carried by truck will be impacted. Republican U.S. Senator Deb Fischer of Nebraska proposed a resolution that would have blocked the EPA mandate. It passed the Senate in April and the House in May, but Biden used his veto power to kill the resolution shortly thereafter.

195. Biden refused to attend 9/11/23 memorials.
196. The Biden administration proposed to block of thousands of acres from future oil drilling or mining in northern New Mexico in an effort to protect Native American lands. According to the Department of the Interior (DOI), the proposal would ban new mining claims and oil and gas development across more than 4,200 acres in Sandoval County, New Mexico, located north of Albuquerque. If finalized and implemented, the action would remain in place for up to 50 years.
197. The Biden administration has appointed James Clapper, John Brennan, and Paul Kolbe, former intelligence officials, to a DHS "Homeland Intelligence Experts Group" handling national security issues. These individuals signed the fraudulent October 2020 letter deceptively asserting that Hunter Biden's laptop was likely Russian disinformation.
198. President Biden is planning to sign an executive order Wednesday to establish a federal workforce training and service initiative as part of his administration's efforts to fight climate change. Biden's so-called American Climate Corps will, according to the White House, mobilize "a new, diverse generation" of more than 20,000 Americans who will be trained and put to work on conservation, clean energy and environmental justice projects. The ultimate goal of the program is to pave the way for members of the corps to find jobs in the public and private sector. This is a massive waste of taxpayer money on the fraud and hoax that is "climate change". This was not authorized or funded by Congress. In fact it was proposed by democrats a year ago, voted upon, and rejected.
199. Biden will grant 470,000 illegal aliens a US id (probably driver's license) and register them to vote at the same time, allowing them to obtain work visas.
200. President Biden complimented the merits of the "Congressional Black Caucus" during a speech to the Congressional Hispanic Caucus Thursday, his third public speaking gaffe in just two days. This senile communist commands nuclear forces.
201. The Biden administration has unleashed a new program to boost illegal immigration that allows immigrants to fly directly from their hometowns into a U.S. city of their choice, according to newly obtained records. Instead of rushing the Texas border, the program lets immigrants use the administration's app to pick a destination, buy an airline ticket, and fly in unseen on what amounts to ghost flights.

202. As of 9/23, Biden has allowed 7.3 million (more than the population of 36 states) illegal migrants to enter the country. He flew over 221,456 to destinations on secret night flights to 43 cities.
203. Under Biden's reign as dictator of the US, he has allowed 8 million illegal immigrants into the country. All of them are eating and living on your tax dollars.
204. In a 424-1 vote, the House approved the Protecting Hunting Heritage and Education Act with 216 Republicans and 208 Democrats voting in favor, and just one lawmaker, Rep. Veronica Escobar, D-Texas, voting against. Rep. Mark Green, R-Tenn., introduced the bill on Aug. 1, days after a report in late July revealed the Department of Education was withholding funds for school hunting and archery courses.
205. Failed to prevent the border being used to traffic Fentanyl into the country. So far this year, 411 million fatal doses of Fentanyl have been intercepted, enough to kill every citizen of this country. Both the Mexican cartels and China are the sources of this poison.
206. The Biden administration proposed its highly-anticipated offshore oil and gas leasing program for the next five years on the morning of Sept. 29, 2023, laying out just three Gulf of Mexico lease sales through 2029. The Department of the Interior (DOI) published the plan in a federal filing early Friday, laying out plans to lease oil and gas drilling rights across the Gulf of Mexico in 2025, 2027 and 2029. The plan, which is slated to be finalized by the end of the year, represents the lowest number of offshore lease sales ever proposed by the federal government and blocks leasing off the Alaskan coast, and in the Atlantic and Pacific Oceans. "The release of the U.S. offshore leasing program, mandated by law and long overdue, is an utter failure for the country," Erik Milito, the president of the National Ocean Industries Association, which represents both traditional and renewable offshore energy producers, said in a statement Friday. "President Biden's approach significantly curtails access to a critical national asset at a time when energy inflation is rampant, the likelihood of a national recession looms, and global efforts are intensifying to curb greenhouse gas emissions," Milito said. "The White House simply ignores our energy realities in once again limiting U.S. energy production opportunities."
207. In 2022, Biden sold off Trump's border wall components for literally pennies on the dollar. Now, in 2023, Biden asked for \$4 billion to build a wall in Texas.
208. The Biden administration announced October 4, 2023, that an additional 125,000 student loan borrowers would receive a portion of \$9 billion in additional debt forgiveness. The relief comes through fixes the administration made to income-driven repayment (IDR) and Public Service Loan Forgiveness, and by canceling debt for borrowers with total and permanent disabilities, the White House said. In total, the Biden

administration has canceled \$127 billion in student debt for 3.6 million Americans. This is very clearly pandering to student loan deadbeats with taxpayer funds. He's using it to buy votes.

209. The deadly folly of Biden's open borders policy has allowed 8 million unknown people to enter the US and now the government has no idea where 99% of those illegals are. * million is equivalent to the amount of people in 4 Nebraskas or the 13th largest state in the country. All of these people are being supported by your tax dollars, food, housing, health care, who knows what else. As an illegal, they are not supposed to be able to get a work permit. There will be terrorist attacks on US citizens and property as a result of these traitors' behavior enabled by Biden. I can only hope that those who voted for and continue to support Biden will be the ones impacted by the terrorists allowed to enter this country. Unfortunately, the odds are slim that those to be affected by those terrorists will confine their efforts to Biden supporters.
210. Biden's green energy regulations have added \$9166 to the cost of a house purchase. Some of the added expenses include \$2,800 more for water heaters, \$1,100 more for air conditioners, and \$140 more for light bulbs and ceiling fans. That is if you will even be able to buy a gas stove or gas furnace.
211. Now Joe Biden's administration is preparing to take a major step in determining what people think with a plan by the Equal Employment Opportunity Commission (EEOC) to dictate how transgenderism and abortion are addressed in the workplace. Through its rule-making process, the EEOC is preparing to identify the simple "voicing of opposition to abortion or contraception as policy matters" as "workplace harassment." Or "failing to refer to an employee or a co-worker by their preferred pronouns." The plan would undermine sex-segregated spaces and stifle free speech in the workplace on topics such as abortion and gender identity ideology by expanding the definition of what constitutes 'workplace harassment.' Under the guidance, members of the workforce who are pro-life or who do not hold to the tenets of gender identity ideology could be found guilty of harassment for expressing or living in accordance with their views.
212. There is no doubt that Biden caused this mess in Gaza and Israel. By reducing or eliminating the sanctions against Iran, directly paying Iran \$6 billion, and permitting Iran to continue to export oil while halting US oil production, it is estimated that Biden enriched Iran by at least \$50 billion which permitted Hamas to flourish and arm itself, ultimately attacking Israel on October 7, 2023.
213. The National Labor Relations Board's new standard makes franchisees and contractors joint employers with their corporate parents. It expands the definition of employer from the commonsense one of a business that has

"direct and immediate" control over employees to one that exercises mere "indirect" or "reserved" control. As a result, corporations will curtail franchising and contracting opportunities due to liability concerns. If, for example, a restaurant or hotel franchisee improperly calculates an overtime payment, or if a janitorial contractor on a job site misses a safety regulation, greedy plaintiff lawyers can sue the corporation, which is now jointly responsible. Existing franchisees and contractors would become mere middle managers who report to corporations, rather than entrepreneurs and owners of their own business. That's some reward for years of hard work building a business. This same regulation was proposed in 2015 under Obama and was overturned by Trump. Further proof that the Biden administration is nothing more than a third term Obama administration.

214. In May, the Environmental Protection Agency (EPA) announced proposed rules to regulate carbon dioxide emissions from new and existing power plants. Modeling at American Experiment found these strict regulations would cause massive rolling blackouts in America's heartland by forcing reliable, abundant forms of traditional U.S. energy — like coal and natural gas — out of use. On top of blackouts, these regulations will also result in higher power bills and greater dependence on hostile foreign energy sources.
215. Biden thinks more of grizzly bears than American citizens with his administration's plan to release the bears near towns then forbidding people to kill them by stating they will be fined immense amounts for killing an endangered species. If they are so concerned with bears, then release them in central Alaska, not northern Washington.
216. In November 2023, at a meeting with the Communist Chairman of China, the State Department announced it had struck a deal with its Chinese counterparts pledging to "accelerate the substitution for coal, oil and gas generation" with green energy sources like wind and solar power. The nations, which account for nearly half of global greenhouse gas emissions, also agreed to "deepen policy exchanges" on reducing carbon emissions in various sectors, like power, industry, buildings and transportation, across their economies. This administration sold out this country and its economy to the Communist Chinese for a fool's desire to promote green energy, produced by Chinese devices at the expense of US produced energy sources.
217. President Biden invoked a Cold War-era law in a surprising move on Friday November 17, 2023, to pour taxpayer funds into domestic manufacturing of electric heat pumps, an alternative to gas-powered residential furnaces. In a joint announcement with the White House, the Department of Energy (DOE) said the federal government would award a "historic" \$169 million for nine projects across 15 sites nationwide in an effort to accelerate electric heat pump manufacturing. The significant level of funding was made

- possible after Biden utilized the 1950 Defense Production Act (DPA) to increase domestic production of green energy technologies.
218. A group of House lawmakers representing the Pacific Northwest made public a court-approved confidential mediation between the Biden administration and environmental groups pushing to remove four hydroelectric dams in Washington to protect salmon. The document, which until now hasn't been made public, was drafted on Nov. 2, 2023, as part of an agreement in which activist groups agreed to pause their litigation against the federal government. The groups have argued in favor of breaching the four federally-managed dams amid declining salmon populations in the lower Snake River, which winds through Idaho and Washington before feeding into the Columbia River and then into the Pacific Ocean.
 219. Joe Biden once again falsely claimed he taught at the University of Pennsylvania during an interview with MeidasTouch Network co-founder Ben Meiselas. This is one of Joe Biden's **favorite lies** (he has many). Biden has told a version of this lie many times. This time he claimed he taught at the University of Pennsylvania for four years. "I taught at the University of Pennsylvania for four years. I also taught at a law school..." Biden said as the sycophantic host nodded in agreement. Biden was never a "professor" or teacher after serving as Vice President in 2017. He was paid to give a few speeches (typical career politician/DC grifter) but he never taught a class.
 220. The Biden administration plans to buy 2.7 million barrels of oil to help replenish the nation's much-depleted emergency stockpile. The planned purchase for the oil is at an average price of \$79 per barrel, the Department of Energy said in a statement on Friday, Dec. 1, 2023. Biden sold off more than 40% of the Strategic Petroleum Reserve in 2022 to help lower gas prices following the Russian invasion of Ukraine. In total, the White House tapped the reserve four times last year, including when Biden ordered a record-setting 180 million barrels of oil released from the reserve. The White House announced plans earlier this year to replenish the oil reserve with a call for bids to repurchase 60 million barrels of oil – roughly one-third of the emergency supply released by the president in 2022.
 221. Biden has squandered hundreds of billions of dollars, maybe trillions on the climate change hoax. **As reported by EPA, only 19% of all weather stations report an increase in the number of hot days since 1948.** A total of 863 stations, or 81%, reported either a decrease or no change in the number of hot days!
 222. The Biden administration on Friday, Dec. 15, 2023, finalized a plan to dramatically curb the number of offshore oil and gas lease sales over the next five years as it continues to aggressively push green energy development. The Department of the Interior's (DOI) five-year offshore oil

and gas leasing program schedules just three Gulf of Mexico lease sales through 2029, marking the fewest number of sales ever included in such a plan, which the agency is mandated to issue periodically. According to the DOI, holding the sales will enable future offshore wind leases under an Inflation Reduction Act (IRA) provision that tethers the two.

223. The White House announced on Friday, December 22, 2023, that President Joe Biden would be pardoning thousands of people who were convicted for usage and possession of marijuana on federal lands in Washington, D.C. Laws have no meaning to Biden.
224. Now it isn't just gas stoves and in fact, Biden regulators have launched proposed regulations for other appliances that are likely to be as bad or even worse. As with the rest of the Biden administration's energy agenda, these regulations put the climate change agenda ahead of the best interests of consumers. They now include with gas stoves, dishwashers, air conditioners, washing machines, and furnaces. Everything in your house or apartment.
225. The Biden border crisis is the worst in American history — and it's not even close. Since President Joe Biden took office, there have been at least 7.5 million illegal border crossings and nearly 2 million known gotaways. Now Biden is adding insult to injury. Media reports indicate that the border is in such chaos that the Biden administration is using resources from the Veterans Administration to facilitate healthcare for illegal aliens. This is a slap in the face to our veterans and to the taxpayer.
226. Because of Biden's uncontrolled borders and the invasion of 7.5 million undocumented illegals, the resurgence of diseases that this country had under control for decades has occurred. Smallpox, polio, malaria, and leprosy have now been detected in the waste water of New York City.
227. Biden has failed to deal with Yemen Houthi's who have lobbed drones and missiles at international shipping through the Red Sea, thereby causing the shipping to be forced to go around Africa rather than use the Suez Canal.
228. Biden has not responded to Kim Jun Un's shelling of South Korea. That is now the third major war zone that has erupted under Biden's incompetence. There is bound to be a fourth, Taiwan.
229. Now Biden is selling off American land to foreigners, principally Chinese.
230. Biden now plans to shut down multiple hydroelectric dams in Washington state. So, apparently green energy means nothing to Biden after all, rather the harm imposed on American society is his prime objective. Closing and removing the dams will severely impact agriculture, flood control, and hydroelectric power production for the surrounding territory.
231. Biden has nearly bankrupted the country by his flagrant spending for green new deal scams and student loan bribery payoffs. I have no idea how this was possible without Congress and even the Supreme Court said the student loan payoffs weren't legal.

232. The Biden administration finalized regulations on February 7, 2024, severely tightening restrictions on fine particulate matter that the manufacturing and energy sectors are legally allowed to emit, an action that industry said would have devastating economic consequences. The Environmental Protection Agency (EPA) unveiled the regulations Wednesday morning in a joint announcement with environmental activists, saying limiting particulate matter known as PM2.5 or soot would have health benefits for Americans nationwide. The rule making lowers the annual PM2.5 standard from a level of 12 micrograms per cubic meter to a level of 9 micrograms per cubic meter.
233. In an unexpected twist to the Biden regime's environmental policy, affluent areas, including Martha's Vineyard, Montauk, and parts of Nantucket, have been designated as "low-income" communities, making them eligible for federal tax credits for electric vehicle (EV) charger installations, Daily Caller reported.
234. In February, 2024, Biden canceled another \$1.2 billion in student debt without the authority of the Supreme Court or Congress.
235. Biden flew over 357,000 illegal migrants into 43 American airports with 2 year paroles with work permits.
236. 11 out of the last 13 jobs reports have been revised down from the original headline-generating numbers. The jobs created were mostly part-time, not full-time jobs.
237. On March 7, 2021, President Biden issued Executive Order No. 14019 which sought to turn the Department of Justice agencies from their historical missions of law enforcement to voter registration and get out the vote operations.
238. The Environmental Protection Agency announced the new regulations Friday morning, and officials said they represent the strongest-ever greenhouse gas emissions standards of their kind. The rules will kick in beginning in 2026 for model year 2027 vehicles and progressively become more stringent through model year 2032, forcing a larger number of trucks and buses to be zero-emissions in that time frame. The new regulations apply to short-haul and long-haul tractor-trailer trucks, in addition to vocational trucks like delivery vehicles, garbage trucks, school and public transit buses, concrete trucks and fire trucks. EPA previously projected that the standards could lead to 50% of vocational trucks, 35% of short-haul tractor-trailers and 25% of long-haul tractor-trailers produced in 2032 being electric. This will absolutely destroy this civilization. Besides there not being enough chargers or electricity to permit this, it will end all food and goods delivery in the country. It will not be possible to live. These people are absolutely insane.
239. Biden declared Easter to be Day Of Transgender Visibility.

240. Biden once again tries to get 87% of Americans who don't have student loans to pay off the 13% who do after the Supreme Court declared the payoff unconstitutional.
241. Biden's refusal to enforce sanctions against Iran, his payoffs to attempt to bribe them, his failure to retaliate against Houthi attacks on shipping, all caused the Iranian missile and drone attack on Israel.
242. Joe Biden told Iran's leaders not to attack Israel, but they ignored him. Then he said they could attack Israel with some restrictions, though they clearly ignored that as well. Now, Biden is telling Israel not to retaliate.
243. President Biden's latest proposal to hike the top capital gains tax rate to its highest level in more than a century is facing heavy criticism from experts who warn such an action could significantly harm the U.S. economy. According to a report issued by the Treasury Department, led by Secretary Janet Yellen, the president's proposed fiscal year 2025 budget would increase the top marginal rate on long-term capital gains and qualified dividends to a staggering 44.6%. A capital gains tax hike of that magnitude would take the rate to its highest level since it was first introduced in the early 1920s.
244. Biden has ordered the EPA to issue new rules that will either make electricity more expensive or remove some of it from the power grid. (Possibly both.) Under the new rules, coal and natural gas power plants will be forced to capture nearly all smokestack emissions or... (wait for it) shut down.
245. Biden's EPA rules that all coal plants that plan to stay open beyond 2039 and any new natural gas plant would have to cut or capture 90% of their carbon dioxide emissions by 2032. Plants that expect to retire by 2039 face less stringent standards but still would have to capture some emissions. And while current natural gas plants are safe for the time being, any new plant will have to adhere to these regulations.
246. Biden halted a weapons shipment to Israel without telling Congress for the stated reason that Israel was about to invade Rafah.
247. Tennessee Attorney General Jonathan Skrmetti led a coalition of 18 states in filing a lawsuit against Biden's Equal Employment Opportunity Commission (EEOC) after it published its new sexual harassment guidance extending Title VII's protections against sex-based discrimination to cover gender identity. In April, the EEOC released its new guidance, which insisted that employers are liable under Title VII if they or another employee use the incorrect name or pronoun of an employee's preferred gender identity. Further, the employer can be liable for limiting access to bathrooms and other facilities, such as showers or locker rooms, based on biological sex and not on gender identity. If a customer or other non-employee fails to use an employee's preferred pronouns or refuses to share a restroom with someone of the opposite sex, the employer can also be sued.

248. Biden has attempted to wipe out \$167 BILLION in student loan debt. Debt that the “students” readily agreed to repay. “Students” who spent semesters overseas “studying”. “Students” who degreed in art history, gender studies, political “science”, or English literature. None of this money was authorized by Congress.
249. The Biden Administration has rewritten the Title IX rules that for 50 years have affirmed equality for women’s sports to now replace the female sex with the term gender thereby killing competitive women’s sports.
250. A situation continues to devolve in the West African nation of Niger, where Biden is — despite his tough talk about Putin when discussing Ukraine — staging a U.S. retreat as Russian forces and other American adversaries take control. According to an announcement last month, the Department of Defense will withdraw American forces from Niger by September 15.
251. Biden’s failure to deal with the rebel Houthi’s has caused Suez Canal traffic to less than 50% of what it was a couple years ago, shipping costs have increased by 44% and shipping punctuality has decreased by over 40%.
252. Biden squandered \$7.5 billion to build 8 EV charging stations due to DEI requirements.
253. Biden squandered \$42 billion to build high speed internet. None has been built.
254. Biden squandered \$224 million to build a floating pier off the Gaza Strip which has had to be rebuilt twice due to heavy seas and over 50% cargo that is offloaded is stolen by Hamas.
255. As head of ocean freight for the Americas at Rhenus Logistics, a company based in Germany, Ms. Loomis spends her days negotiating with international shipping carriers on behalf of clients moving products and parts around the globe. Over the last few months, she has watched cargo prices soar as a series of disturbances have roiled the seas. Late last year, Houthi rebels in Yemen began firing on ships entering the Red Sea en route to the Suez Canal, a vital artery for vessels moving between Asia, Europe and the East Coast of the United States. That prompted ships to avoid the waterway, instead moving the long way around Africa, lengthening their journeys by as much as two weeks. Biden’s failure to deal with Houthi’s and pirates has immensely inflated the prices of all goods, fuel, and the shipping costs and pipeline delays of all items.
256. Just in time for voting, Biden granted amnesty to 500,000 illegal aliens.
257. Biden claims to have paid off \$167 billion of student loan debt by 10 million people who made poor education decisions. Here’s what that passed up: 11 Ford Class carriers, 83 Burke Class destroyers, 167

frigates, 35 Virginia Class submarines, and the recapitalization of the ICBM force. Remember that when war breaks out.

258. "Under the Biden-Harris Administration, of the more than 250 illegal aliens on the terrorist watchlist who were encountered by Border Patrol at the southwest border between fiscal years 2021 and 2023, DHS has released into American communities at least 99, with at least 34 others in DHS custody but not yet removed from the United States," the report by Republicans on the House Judiciary Committee, a copy of which was first obtained by Fox News Digital, says. The staff interim report also found that immigration judges granted bond to at least 27 migrants on the watchlist who entered illegally, and that Border Patrol has encountered tens of thousands of migrants from countries that could present national security risks – including 2,134 Afghan nationals, 33,347 Chinese nationals, 541 Iranian nationals, 520 Syrian nationals, and 3,104 Uzbek nationals.
259. "[T]he Biden-Harris Administration is announcing a new goal to phase out federal procurement of single-use plastics from food service operations, events, and packaging by 2027, and from all federal operations by 2035," the White House said. "Meeting the new goal... will further agencies' obligations under the [previous] Executive Order." The administration did grant an exception in cases of "national security."
260. Fifteen states filed a federal lawsuit Thursday, August 8, 2024, against the Biden administration over a rule that is expected to allow 100,000 immigrants brought to the U.S. illegally as children to enroll next year in the federal Affordable Care Act's health insurance. Fifteen states filed a federal lawsuit Thursday against the Biden administration over a rule that is expected to allow 100,000 immigrants brought to the U.S. illegally as children to enroll next year in the federal Affordable Care Act's health insurance.

You can't have an ICE car. You can't have electricity (coal fired, nuclear, gas, propane, or hydroelectric). You can't have air conditioning. You can't have heating. You can't have a gas stove. You can't have a dishwasher. You can't have a refrigerator. You can't have a washing machine. You can't have a toilet that flushes. You can't have girls competing with girls in sports. STOP TELLING US WHAT TO DO, you dictator.

The senile Biden has an ego that is more important to him than the lives of 330 million people. His obvious inability to process information or his surroundings is placing our lives at risk of nuclear attack in the six minutes that will elapse after some Iranian, North Korean, Russian or Chinese launches nuclear weapons at this country. Awakened from his six hour workday, Biden won't be able to issue the order to respond. We may even lose the ability to respond at all. If the

Justice Department said Biden wasn't competent enough to stand trial for a classified documents case, how is he competent to have nuclear codes?

This isn't a legitimate president. Everything he's done has hurt America and American citizens. He has destroyed this country in a little over three years. There has never been a president that intentionally injured the citizens and fostered a socialist, Marxist nation. He has, through his ignorant climate change hoax ideology based on falsified British socialist climatologists' data, drastically decreased our retirement accounts through inflation caused by reckless spending, made the cost of living of everything increase due to his perverted climate change beliefs and forcing our continued dependence on foreign petroleum while decreasing our domestic oil production - enriching foreign governments and impoverishing our own, and throttled the our entire cooking, laundry, heating and cooling and transportation capabilities - the basic capabilities of civilization, and purposely tried to dilute the white European history of this country with his failure to enforce border restrictions allowing millions of unaccounted illegals to enter the country, indeed he promoted it. Migrants now account for more than 15% of the US population, blacks 14%. This is what happens when you allow an immensely ignorant criminal who graduated 76 out of a law class of 85 direct the federal government and have them cover up his and his criminal, drug addict son's crimes of influence peddling and bribery.

He has accomplished these 250+ actions that hurt the nation while taking 306 days of vacation, fully 40% of his time on the job. So, while the Germans and Japanese combined took nearly 5 years to try to destroy this country, it only took Biden 60% of four years to indeed destroy it. By not renewing the Petrodollar agreement with Saudi Arabia, he has removed the US dollar from being the world's reserve currency and massively reduced the dollar on the world market. Not only did he waste trillions of taxpayer dollars on useless projects (climate change scam, EV chargers, no high speed internet) he devalued what tax dollars he didn't spend.

These are the only items I've tracked from following the news. Undoubtedly, there are many more I'm not aware of. There are many charges that can derive from his actions: treason, failure to uphold laws and the Constitution, incompetence, assisting the enemy, libel, influence peddling, accepting foreign payments, harboring his criminal son, failure to protect the citizens and welfare of US citizens. The cowards in the intelligence community have also failed this country. The FBI, CIA, NSA, and Justice Department should all be dissolved for conspiracy to fail to perform their jobs and prosecute Biden and his son for their crimes and protect Biden from investigation.

The Biden administration has also ruined the military. By using DEI policies instead of competence and excellence, the Navy cannot navigate ships without running into each other, the Air Force cannot recruit enough personnel to keep the planes flying, the Army can't shoot or perform physical exercises. Only the Marine Corps is meeting recruiting goals though they are being "phased out". What's the use of even having a military if they can't fight and won't against Mexican cartels that are now running the southern border.

So, in addition to turning American into a South American third world country in less than three years, he's killed off the economy, killed off jobs, increased crime, prevented transportation, nearly started World War III, tried to prevent you from cooking in your home with gas stoves, and tried to prevent your home from being comfortable in the heat of summer with your air conditioner or furnace in winter, and pissed away our tax money for many generations to come. With his EPA outlawing CFC's that will prevent refrigeration, let me know how your food storage goes in your sweltering home in July. Just wait till January I guess when you can store frozen meat in your bedroom. By killing off refrigeration, hot water, gas stoves, air conditioning, and home heating, he has thrown this country back into the early 1800's. I believe he is a Chinese communist operative who has irreparably damaged this entire country. *"The Bidens are the best at doing exactly what Chairman wants."* That WhatsApp message to a Chinese business associate was the **perfect epitaph for the entire Biden corruption scandal**. He has let crime run wild by the "Justice" department and not only allowed this country to be overrun with foreign immigrants but encouraged it and then hid it by night time flight operations shipping the illegals all over the country. By not vetting the illegal aliens, he has brought back diseases that were wiped out in this country years ago. He has failed to uphold the constitution and laws of this country. I think he should be tried for treason.

This doddering, senile, ignorant, criminal, communist president has commanded what you can use to heat and cool your home, what you can light it with, what fans you can use, what you can cook with, what you can eat, what you can drive, how you can receive goods that you need via trucks and railroads. He has not addressed the highest prescription drug costs in the world, and yet he has not addressed the Mexican cartels and Chinese who have killed many thousands of US citizens with poisonous Fentanyl.

While the rest of you may have ignored the destruction of law, order, and civilization as we knew it, worried about political correctness and fake racism, the press and media were overtaken by libtard high tech and closed off honest reporting.

And you thought he and communist Kamala (chosen because he knew she was worse than him) didn't have a plan. They killed this country. That was the plan.

Note that on day 1 of his presidency, Biden cancelled the Keystone pipeline, then shut down a lot of other existing pipelines, canceled federal oil and gas production leases, canceled existing federal land production leases, and essentially shut down oil and gas production in the US driving gasoline prices north of \$7.00 a gallon and sparking the worst inflation in prices of all goods and services throughout the country. Then, in a failed effort to ease inflation caused by high fuel prices, he released oil from the Strategic Petroleum Reserve (to be used only in the event of an emergency or war) to be sold at below market value, thereby squandering the taxpayer money used to buy it in the first place - just like he sold off (for pennies) the border wall components that taxpayers paid for under Trump. This communist president has bankrupted the country and economy at every turn.

By passing yet more wasteful spending bills that spend taxpayer money on useless "clean energy" projects that have not contributed a single penny of reduced energy costs at the absolute height of inflation and recessionary conditions, the Democrats have absolutely proved that they intended to destroy this country. They have rotted out the complete education system, fostered their racist and perverted sex programs, gender transformation of children, with a raging crossing dressing transvestite nuclear energy water czar parading about in dresses and high heels, and now decimated the military with their perverted practices. The end is near and probably cannot now be halted or reversed. Their perverted practices have used our taxes to halt energy and food production, allowed billionaires to purchase production farmland which has been taken out of production in the name of clean energy thereby causing food and meat shortages. If YOU were going to destroy this country from within, what would YOU have done differently?

Four years of open borders, massive spending and debt, green energy fraud, record inflation, the worst crime wave in modern history, censorship, weaponization of government and wars breaking out all over the world threaten to destroy our country, our freedoms, our free speech and our quality of life forever. This is the end of 250 years of civilized development and work to improve this country since it was first entered by the Pilgrims. Only took Biden and the democrats four years to completely destroy it.

Are you happy with the way things turned out? If you voted for this, this is what you got.

Game over.
